EDUCATION

African Leadership University

Kigali, Rwanda

BSc in Software Engineering

May 2024 – Jul 2027

- **GPA:** 4.46/5.00
- **Related Coursework:** Linux & System Tools • Python & Databases • Frontend Development (HTML, CSS, SCSS, Tailwind CSS) • Web Infrastructure & Deployment (SSH, HTTPS, Load Balancing, Docker)

IPRC KICUKIRO

Kigali, Rwanda

Computer Networking

Jan 2018 – Jul 2021

- **Related Coursework:** Network Administration • Wireless Networking • Audio Visual Systems

EXPERIENCE

The Gym Rwanda

Kigali, Rwanda

Software Development Coach – Core Skills Training

Feb 2026 – Present

- Coach and guide students through The Gym's Core Skills curriculum at Université Libre de Kigali (ULK), covering React, TypeScript, and NestJS.
- Conduct regular check-ins, unblock learners on projects, and facilitate peer collaboration within the cohort.
- Translate personal experience as a Gym graduate into practical mentorship to facilitate student progress.

Trainee – Advanced Backend Skills and Software Architecture

Feb 2026 – Present

- Building secure, enterprise-level backend systems using Java and Spring Boot.
- Building serverless APIs and high-performance platforms for large-scale user bases.

Trainee – Core Skills Training

Nov 2024 – Feb 2026

- Built responsive websites using React, TypeScript, and Tailwind CSS, with exposure to backend development using NestJS.
- Worked on hands-on projects with a team focused on modern frontend development and UI implementation.

PROJECTS

[PlanetMatrix](#)

Remote

Designer & Frontend Developer

Jun 2026

- Landing site for an AI-powered ESG and climate intelligence platform, handling both design and frontend development, delivered in a 6-day sprint.
- Built an interactive tabbed section with four custom dashboard visualisations to present the product's core features.
- Set up contact form email handling, domain verification, DNS configuration, and production deployment with a custom domain.
- Technologies: Next.js, TypeScript, Tailwind CSS, Resend, Vercel
- GitHub: github.com/PlanetMatrix1/planet-matrix | Live site: planet-matrix.com
- Case study: bienvenudev.github.io/projects/planet-matrix

[CBC-ALU](#)

Kigali, Rwanda

Frontend Developer

Mar 2026 – Present

- Official website for the Claude Builder Club at ALU (Anthropic's campus AI programme), serving as a central hub for events, slides, and member projects.
- Developed from scratch; the site is live, actively maintained, and open to contributions from club members.
- Technologies: React, TypeScript, Tailwind CSS, Vercel
- GitHub: github.com/Claude-Builder-Club-ALU/cbc-website | Live site: cbc-alu.tech
- Case study: bienvenudev.github.io/projects/cbc-alu

[Atlas](#)

Kigali, Rwanda

Frontend Developer

Sep 2025

- Mentorship platform connecting Rwandan diaspora professionals with local youth, built for the Code2Unlock Hackathon 2025. Placed 2nd out of 32 teams.
- Built mentor discovery, connection request flows, onboarding screens, and profile pages.
- Technologies: React, TypeScript, Tailwind CSS, Prisma, Vercel
- GitHub: github.com/Hanki-C2U/hanki-web | Live site: atasc2u.vercel.app
- Case study: bienvenudev.github.io/projects/atlas

- Full-stack platform for booking and sharing cars, built across enterprise-style sprints at The Gym.
- Implemented REST APIs and business logic within a modular NestJS backend architecture.
- Built authentication flows, modular backend design, and containerised services using Docker.
- Collaborated in an agile team using Git & GitHub for version control.
- Technologies: React, TypeScript, NestJS, Docker, Git & GitHub
- Case study: bienvenudev.github.io/projects/car-sharing

VOLUNTEERING

- Supported learners through regular check-ins, helping them resolve blockers related to coursework and projects.
- Co-hosted milestone clinics to guide learners through project requirements and completion.
- Collected learner feedback and shared insights with the programme team to improve the learning experience.

SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React, HTML, CSS, SCSS, Tailwind CSS
- **Backend & Infrastructure:** NestJS, Node.js, Express.js, REST APIs, Java, Docker, SSH
- **Tools:** Git, GitHub, VS Code, Vercel

LANGUAGES

- English (Fluent)
- French (Upper-Intermediate)
- Kinyarwanda (Native)
